## BSB bolsters student performance through use of pioneering AI technology

TDI | Manama

Inspired Education Group, the leading global group of premium schools, has announced the results of a pilot programme of AI technology in everyday teaching and learning for secondary school students.

In a national first, the programme, which saw the Inspired AI platform used by pilot group of 160 students at BSB, has demonstrated that participating students saw an improvement in performance of 4.6 percentage points on average.

The success of the pilot means Inspired AI will continue to be rolled out to the wider BSB school community.

The Inspired AI platform leverages artificial intelligence to create bespoke 'pathways' for students across both their classroom and homework, whilst at

John Maguire, Executive Headmaster, British School of Bahrain

the same time providing real-time analytics and recommendations to both teachers and parents.

Inspired AI uses initial 'diagnostic' testing to assess an individual student's respective strengths and weaknesses and,

using this data, then creates tailored exercises and modules for each student across subjects including English, Maths and Science.

These individualised 'pathways' ensure a student's specific weaknesses are addressed and improved upon, whilst at the same time further amplifying their strengths across each subject.

Notably, students involved in the broader international study saw, on average, the greatest improvement in performance across Biology, 10.6 percentage points, and Chemistry, 9.4 percentage points.

John Maguire, Executive Headmaster, British School of Bahrain, said, "The British School of Bahrain has an enviable reputation for innovation and adopting technology to support learning. This ethos

has strengthened our position as the leading British school within the country. Embracing AI aligns with the Kingdom of Bahrain's unrivalled commitment to educational excellence, especially with Bahrain holding the region's longest-established education system. We can see a glimpse into the future of education, where innovation drives us towards greater academic achievement, and we're excited to see what more we can do with it in the future."

In its everyday usage in schools, the Inspired AI platform serves three primary purposes. Firstly, accelerating learning for students through intelligent personalisation.

Secondly, the platform also reduces the workload for teachers, particularly in terms of marking, analysis, and resource creation.

## New Horizon School solemnise Indian Teachers Day and its Foundation Day

New Horizon School yesterday celebrated Indian Teachers Day along with its Foundation Day, marking 23 years of excellence in the field of quality education in both Zinj and Segayya campuses. School Chairman, Joy Mathews, addressed the gathering and wished all the teachers on this aesthetic juncture. Principal, Vandana Sathesh, felicitated all the teachers, by furnishing their dedication and hard work, with a small token of love on behalf of the management. All the students bestowed their endearment towards their teachers by presenting them with alluring hand-made cards, sweets and much more.

## Bhavans Bahrain Indian School commemorates Teacher's Day

Bhavans Bahrain Indian School celebrated Teacher's Day with a special assembly by the student Council members. They presented a cultural program, quiz and played videos highlighting their love and admiration towards the teachers. Principal Saji Jacob guided the teachers during the oath taking ceremony and also motivated all to continue doing the great work. Directors Himanshu Verma and Ritu Verma appreciated the efforts of teachers in making the learning interesting and thereby taking the school to new heights

## BENEFIT hosts Bahrain Future Leaders Summer Camp

TDI | Manama

BENEFIT, the Kingdom's innovator and leading company in Fintech and electronic financial transactions service, announced hosting the Future Leaders Summer Camp for the summer of 2023 organized by Bahrain Islamic Bank (BisB) and INJAZ Bahrain.

The program, which took place on August 22nd and 23rd, sought to inspire and empower the next generation of leaders by offering students an initial glimpse into the corporate realm.

BENEFIT hosted 80 male and female young students in Future Leaders Summer Camp aged 13 to 15 from intermediate schools.

The initiative promised to reflect BENEFIT's dedication to youth development as well as its steadfast confidence in the value of diversity and inclusion.

The two-day event was filled with intriguing and informative activities aimed to provide students with significant insights into the business world.

The program's highlight was a guided company tour, during which students had the opportunity to engage with BENEFIT's Chief Executive, as well as officials from several departments.

These department mem-

bers shared their expertise and skills, providing students with an insight into the various roles that enable a firm to prosper.

A significant component of the programme is the Innovation Challenge, encouraging students to push the boundaries, think creatively and collaborate to tackle real-world challenges.

This hands-on exercise develops critical thinking abilities, and also builds an entrepreneurial spirit and financial literacy amongst participants.

Hanan Hasan, Manager, PR & Corporate Communication at BENEFIT, commented, "By opening our doors to these exceptional youths, we aspire to inspire them and offer them with the skills they need to lay the foundations for a successful future."

## ASU offers scholarships for first academic year in British hosted programmes

TDI | Manama

Applied Science University (ASU) announced new partial scholarships ranging from 30% to 40% on the first academic year to all students enrolled in British programmes hosted by London South Bank University (LSBU) for the first semester 2023/2024, according to the graduation GPA of the applicant.

In fact, students with GPA of 85% or above receive a 40% scholarship, while students with GPA of less than 85% receive a 30% scholarship for the

first academic year, and students continue to receive partial scholarships for the remaining academic years as per the academic excellence scheme, which amount to up to 25%.

Professor Ammar Kaka, President of the University, said that admissions and registration continue for students willing to join the University in the first semester 2023/2024, and explained that the University offers British programmes in cooperation with LSBU in various disciplines that meet the needs of the labour market.

A general view of ASU

Applicants can enroll at the University by visiting the campus and completing all their registration procedures or through the website of the University.

There are 6 British programmes offered for the first

semester 2023/2024 at ASU: BA (Hons) Business Management, BENG (Hons) Mechanical Engineering, BENG (Hons) Electrical and Electronic Engineering, BENG (Hons) Civil Engineering and BENG (Hons) Architectural Engineering, in addition to LLB (Hons) Law, which is distinguished by providing students with the opportunity to study both the Bahraini and British laws, which opens broad prospects for them to work in the legal field after graduation and successfully join the labour market in Bahrain and beyond.

## New Millennium School Bahrain celebrates Teachers' Day

New Millennium School, Bahrain yesterday celebrated Teachers' Day to acknowledge the selfless contribution of the teachers in shaping an intellectually bright society. The staff members of the school were felicitated on the occasion. Principal Arun Kumar Sharma appreciated the effort of the students in putting up such an entertaining programme and extolled them on their performance. Chairman Dr Ravi Pillai and Managing Director Geetha Pillai extended their warmest wishes to the entire teaching fraternity on this joyous occasion.
